stefanleki18@gmail.com | +381 62 921 6450 | Novi Sad, Serbia | **GitHub:** github.com/leki18 | **LinkedIn:** [linkedin.com/in/leki18](https://www.linkedin.com/in/leki18)

WORK EXPERIENCE

InfoARS | *Banja Luka, Bosnia and Herzegovina* **Nov. 2021**
Data Analyst Intern

- InfoARS is an IT education and digital services company specializing in programming, web technologies, design, and technology training
- Developed Python and PHP web scraping scripts to collect, process, and analyze large datasets

EastCode | *Banja Luka, Bosnia and Herzegovina* **Feb. 2021**
IT Support Intern

- EastCode is an IT company focused on software development, technology solutions, and IT services, providing digital products and technical expertise for businesses
- Assisted with operating system installation, system and application configuration, and implementation of basic computer security practices
- Completed practical assessments covering hardware and software architecture as part of technical training

PROJECTS

Autonomous Collision Avoidance and Road Sign Detection System
GitHub: github.com/leki18/autonomous-collision-avoidance-and-road-sign-detection-system

- Built a simulated autonomous driving environment with sensor-based perception and real-time decision-making capabilities using Python and C#
- Applied sensor fusion, computer vision, and machine learning for image object detection, road sign recognition, and collision avoidance

Evolutionary Agent-Based Real-Time Simulated Environment
GitHub: github.com/leki18/evolutionary-agent-based-real-time-simulated-environment

- Built a real-time Unity simulation of an autonomous environment with evolving agents using C#
- Implemented genetic inheritance, mutation mechanisms, and more than 20 behavioral attributes influencing agent behavior and movement, as well as wider population dynamics

Real-Time Graph Visualization and Analysis Platform
GitHub: github.com/leki18/interactive-graph-visualizer

- Built a real-time interactive graph visualization system using Django, D3.js, and HTMX
- Implemented a modular component-based architecture for scalability and extensibility

EDUCATION

Bachelor of Engineering in Software Engineering **Present**
Faculty of Technical Sciences *Novi Sad, Serbia*

Computer Engineering Technician **2022**
Electrical Engineering School "Nikola Tesla" *Banja Luka, Bosnia and Herzegovina*

COMPETITIONS

Regional Informatics Competition **May 2021**
Republic Informatics Competition **May 2021**

SKILLS & INTERESTS

- **Technical Skills:** OOP, Algorithms & Data Structures, Data Analysis, Software Testing, Team Collaboration
- **Technologies:** Python, Java, JavaScript, HTML/CSS, C++, C#, PostgreSQL, Git, Linux
- **Frameworks & Libraries:** scikit-learn, Spring Boot, JUnit, Selenium, Angular, GLFW, Unity
- **Languages:** Serbian (Native), English (C1)
- **Interests:** Game Development, 3D Modeling, 3D Animation, Real-Time Simulation Systems, Machine Learning
